Subject: Flint Hills Resources Alaska - North Pole Refinery Sulfolane

Brandon;

Appreciate you taking the time to visit with me today regarding the EPA Hazard Ranking process as it relates to the Flint Hills Resources Alaska North Pole Refinery site. Per our discussion, I have attached a white paper recently updated (this August) by our contractor ToxStrategies, Inc.. I think there may be valuable information contained in this paper that could assist in the ranking process including a recently obtained study from Huntingdon Life Sciences (HLS). Please feel free to forward as necessary. Also, I would appreciate any information you might be able to provide on the EPA process of development of toxic factors. You had mentioned a web link and also an individual at EPA headquarters that I might be able to refer our ToxStrategies, Inc. contractor, Dr. Laurie Haws to contact for more information. If you have any questions or concerns, please feel free to call me at 316-208-8894.

Marc Coggeshall
Director of Strategic Initiatives
Flint Hills Resources, LP
